***Allowable Subject Matter***

1. Claims 1-84 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's remarks and arguments to the Advisory Action mailed on 4/8/2004 overcomes the 35 USC 112, first paragraph rejection of claims 1-84, specifically claims 1, 31, and 82-84, which recite "wherein the catalyst composition is used directly without intervening reducing step or oxidizing step".

The instant application is allowable over the cited prior art, because the cited prior art fails to disclose wherein the carbonylation catalyst composition may be used directly without an intervening reducing step or oxidizing step, as a carbonylation catalyst. Ofori et al. (US Patent 5,981,788) teaches the recovery of catalyst constituents for recycle by extraction and evaporation followed by oxidation and reduction. Buysch et al. teaches wherein the catalyst is reactivated using an oxidizing agent. The instant invention is allowable over the cited prior art, because the instantly claimed carbonylation catalyst may be practiced without the oxidation and reduction steps as required in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1754
